

Clinical expertise. Structured evaluation.

MedEvalis is a boutique medical AI evaluation service bringing together Germany-based specialists in **neurosurgery** and **orthopaedics and trauma surgery**. We help AI teams identify errors, omissions and unsupported conclusions, with explained findings and practical corrections.

SERVICES

AI response evaluation. Assess and compare medical outputs using agreed criteria and written explanations.

Specialist scenarios and rubrics. Develop fictional cases, reference responses and clear assessment criteria.

Clinical content review. Review summaries and educational content; annotate errors and propose corrections.

CLINICAL REVIEWERS

Dr Hazim Al-Zyoud

Neurosurgery | FEBNS, MHBA

German-board-certified neurosurgeon with experience in general neurosurgery, brain and spinal tumours, neurotrauma and complex spine surgery. His clinical career includes senior consultant and spine leadership roles in Germany.

Dr Ala Alsharif

Orthopaedics and trauma | M.D., FEBOT

German-board-certified specialist with orthopaedic and trauma training and subsequent consultant spine surgery experience. His recent clinical practice focuses on minimally invasive and endoscopic spine procedures.

Shared strength: spine surgery. Case allocation and any second review depend on the appropriate specialty and current clinical expertise.

A FOCUSED FIRST ENGAGEMENT

Start with a focused, fixed-fee project. Agree the use case, reviewer, language, deliverables, timeline and fee before work begins. Receive a scoring sheet, explained corrections and a concise findings report.

Review languages: English, Arabic and German, agreed by project.

Findings apply to the material reviewed. This review does not establish whole-product clinical validation or regulatory approval. Services are for AI development teams; no patient consultations.
